

The Smart Money's on Arnco.

Because Arnco is not only one of the oldest, but also one of the largest manufacturers of polyurethanes in the world, you can be assured you will be getting the best chemical systems and the best service for the best price, Guaranteed!

Tradition

Arnco's spray elastomer formulations have been proven (and improved) in a variety of commercial applications over the last 15 years. Arnco chooses to support and supply systems to only the best applicators in the industry. We sell chemical systems, not franchises! Therefore, we are very serious about maintaining strong, open relationships with applicators that choose Arnco as a systems supplier. We do this through quality raw materials, service, value pricing and strategic distribution sites.

Who is Arnco?

Arnco, a pioneer in the development and manufacturing of polyurethane elastomers since 1971, has consistently produced unique systems to meet a wide range of demanding applications. The Performance Polymers Group is built on a long tradition of advancing urethane technology, with experienced, dedicated people driving our business toward new markets. We are utilizing Arnco's existing strengths to move ahead with even more innovative products for the future. The Performance Polymers Group is committed to establishing true partnerships with our customers, and to providing added value with cutting edge systems, consistent high quality, and competitive economics.

Our Guarantee

Our mission at Arnco is to provide the best value in goods and services to our strategic partners – our customers. We are dedicated to the continuous strengthening of our relationships by supplying innovative products and marketing assistance to enhance the growth of our partners' sales and profits.

Arnco's S P A N Network

Arnco is establishing a national network: S P A N - "Spray Polyurethane Applicator Network," which is an organization of independent applicators supplied directly by the manufacturer. Members of this network will be the most efficient, competitive and highest quality providers of spray elastomer coatings in North America. SPAN enables applicators to operate their companies independent of franchise or dealer restrictions, while maximizing profitability for their businesses.

Members of SPAN enjoy advantages:

- No Franchise Fees, Quotas or Restrictions
- Product Direct from the Manufacturer
- Competitive Equipment Pricing
- Freedom from Unfair Competition or Dealer Area Saturation
- Real-Time Technical Support
- Worldwide Manufacturing Capability
- Regional Manufacturing/Stocking Locations
- National and Local Advertising
- No Fees for Lead Distribution

More information on the SPAN network available at www.arnconet.com

Arnco's Spray-On Coatings

Arnco produces a variety of **Intellathane Systems** for low-pressure and high-pressure spray elastomer equipment. Applicators choose **Intellathane Systems** because they easily process through existing industrial equipment while producing durable coatings with superior physical properties.

Intellathane Systems Exhibit

- Excellent Overall Physical Durability
- Ease of Processing & Retrofitting
- Chemical and Corrosion Resistance
- Monolithic Surface - Air/Water Seal
- 100% Solids (no VOC's or Solvents)
- Rust & Corrosion Prevention
- Excellent Toughness, Weatherability & Abrasion Resistance
- Variety of Surface Finishes Possible
- Quick Installation - Less Downtime
- Exceptional UV Stability
- No Chalking or Surface Degradation

Applications and Markets

- Industrial/Commercial Floors
- Mining Industry (chutes, conveyers, bins, maintenance equipment)
- Secondary Containment
- Horse Trailers & Scuff Boards
- Bed Liners (commercial/retail trucks & tool carts)
- Pipe Coatings & Flanges
- Boat Decking & Interiors
- Undercoatings - Truck Bodies
- Ponds, Faux Rocks & Waterfalls
- Waterproof Concrete & Wood Decks

Intellathane 500 LP—Tough, yet Good Looking

Arnco's low-pressure (2:1) systems produce highly durable, flexible coatings providing excellent abrasion resistance and reduced cargo slippage. Our systems provide applicators with lower moisture sensitivity versus the competition, allowing a thick, high-build coating that doesn't become spongy. It doesn't warp or crack under extreme temperatures. It's the smart choice for providing a system with the ultimate permanent protection against rust and corrosion.

Low-Pressure Spray Competitive Comparison

| Properties | ARNCO | Competitor A |
|----------------|---------|--------------|
| Hardness (Sh) | 85A | 85A |
| Tensile (psi) | 2600 | 1700 |
| Elongation (%) | 450 | 325 |
| Tear (pli) | 350 | 140 |
| Gel Time (sec) | 10 & 25 | 25 |

Intellathane 520 HP—Good Looking, yet Tough

In areas where high humidity is a factor, most high-pressure (1:1) hybrids fail by pin-holing, blowing or delaminating. Our **Intellathane 520 HP** high pressure system is much less susceptible, due to its high polyurea/urethane ratio. Arnco's hybrids allow price conscious applicators to produce films without processing concerns. It's the smart choice for providing a cost-effective coating. The high-build film is crisp in appearance, while exhibiting excellent tensile/tear strength and balanced elongation.

High-Pressure Spray Competitive Comparison

| Physical Properties | ARNCO | Competitor A |
|---------------------|-------------|--------------|
| Hardness (Sh) | 90A & 95A | 90A |
| Tensile (psi) | 2400 & 2500 | 2400 |
| Elongation (%) | 310 & 290 | 245 |
| Tear (pli) | 350 & 380 | 285 |
| Gel Time (sec) | 7 & 5 | 2-3 |

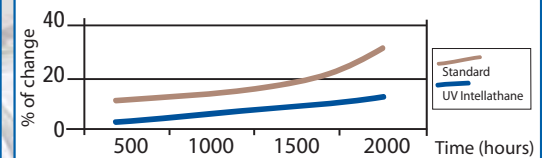

Ultra-Violet Protection—Smart! Eliminate Chalking—Smarter!

Intellathane Systems with UV protectants have passed the most rigorous test used by OEM auto makers.

This test shows that color retention is up to 3 times longer with Intellathane System protectants, compared to standard systems.

Intellathane 500 LP and Intellathane 520 HP Systems provide richer, longer lasting, robust color retention.

Intellathane Color Retention

Intellathane 530

Our 100% polyurea systems offer security when producing coatings in highly humid or low temperature environments, and/or wherever moisture is inherently trapped within the substrate.

High-Pressure Polyurea Spray Competitive Comparison

| Properties | ARNCO | Competitors A & B |
|----------------|-------------|-------------------|
| Hardness (Sh) | 85A & 90A | 85A 90A |
| Tensile (psi) | 3100 & 2500 | 2500 2500 |
| Elongation (%) | 720 & 300 | 720 265 |
| Tear (pli) | 580 & 480 | 430 400 |
| Gel Time (sec) | 12 & 5 | 6 2 |

Arnco's products are offered nationwide to applicators from manufacturing sites in California and Ohio.
