

QUIKGEL™
 Make your flat tires disappear

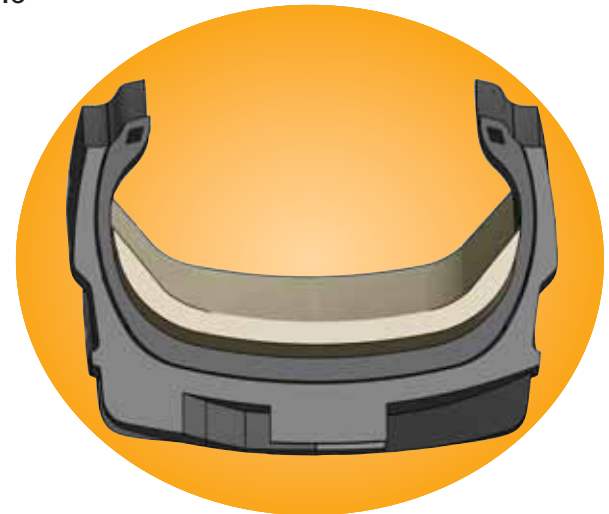

Today's jobsite is a constant threat to the life of pneumatic tires. Riddled with nails and sharp objects, the productivity of your operator and equipment is under continual punishment from debris left lying where it fell. Now you can reduce your vehicle downtime from punctures.

Arnco's new QuikGel liner is a self-sealing polyliner that provides protection from punctures of up to 5/16" A lighter alternative to our line of flatproofing, QuikGel is not a liquid and is ideal for skid steers, forklifts, aerial lifts and other applications where less weight is needed.

Reduce your flat tire worries with Arnco's QuikGel™

- Reduced vehicle downtime provides you with increased vehicle productivity.
- Will not void tire or machine warranties.
- Self-sealing polyurethane gel membrane provides constant protection against most punctures.
- Lightweight puncture protection allows tire and vehicle to perform as it was designed.
- Compatible with Bias or Radial ply tires.
- OEM Approved and Certified.
- Retreadable for the best return on your investment.

 The Tire Flatproofing Experts

QUIKGEL™

Make your flat tires disappear

- Increased shoulder and tread puncture protection for improved performance of tire.
- Up to 5/16" puncture protection – seals most punctures.
- Ideal for most off-road applications.
- Cooler operating than solid tire options – providing longer tread life.
- Centrifugally cast balanced to ensure a smooth ride.
- Works well in high heat applications where other products fail.
- Works well with over-the-tire track applications allowing shedding of foreign debris in track system.
- Optional tread only or tread / sidewall coverage design for application specific needs.
- Better than liquid sealants – cannot leak out.
